

1 exp

1.1 exp

两张图并排，其中一张图还有两个子图 和floatrow这个包冲突，会报错：Package floatrow Error: Caption(s) lost.
caption Flower two.之类的 这个方法就是Fig.1图片的label取不到

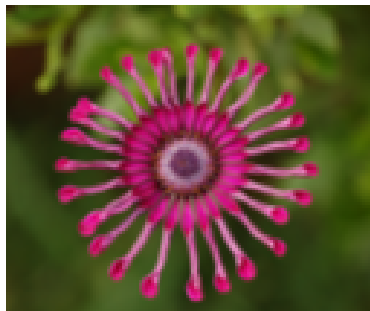

Figure 1: Flower one.

(a) SL=0.5

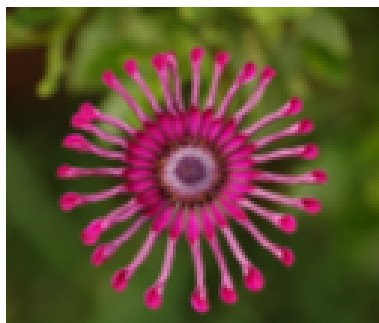

(b) SL=0.5

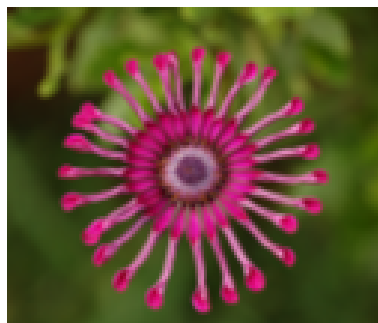

Figure 2: Flower two.

法二：子图模式，用subfig包

法三：用subfigure包

(a) Title A

(b) Title B

Figure 3: Title for both

法四：用minipage + subcaption

图片和表格并排, 用caption包, 参考: <https://www.zhihu.com/question/29803796>

2*2布局的图片

让两个并列但大小不等的图，垂直居中: <http://www.ctex.org/documents/latex/graphics/node109.html>

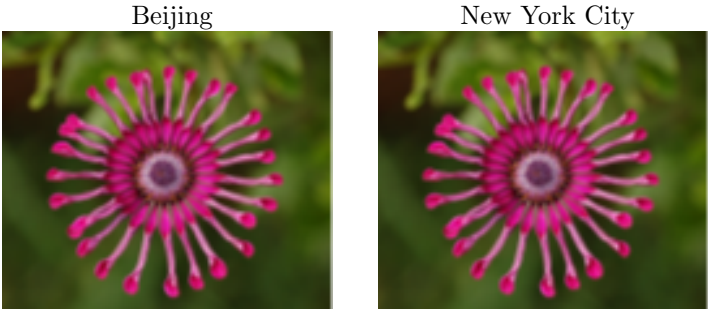

Figure 4: Map gridding of Beijing and New York City. The blue points denote the existing charging stations.
The decimal degree of side length of grids in Beijing and New York is 0.02 and 0.01, respectively.

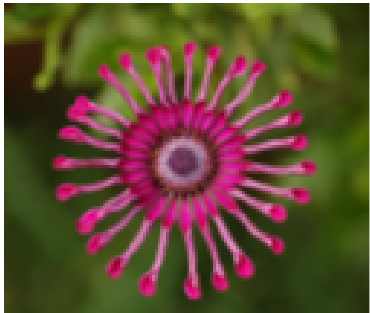

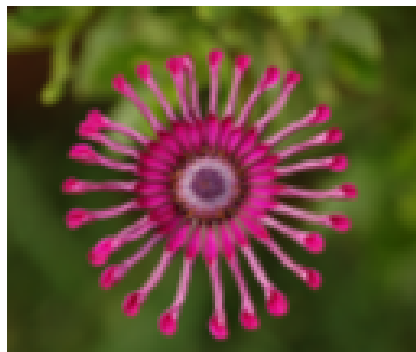

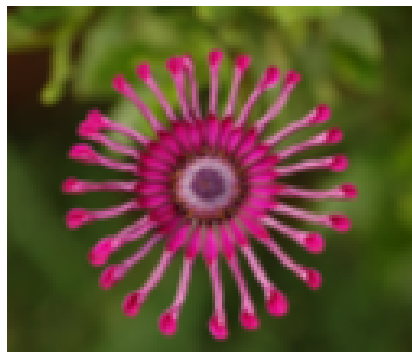

Figure 5: This is a Figure by a Table

| Day | Data |
|-----------|------|
| Monday | 14.6 |
| Tuesday | 14.3 |
| Wednesday | 14.2 |
| Thursday | 14.5 |
| Friday | 14.9 |

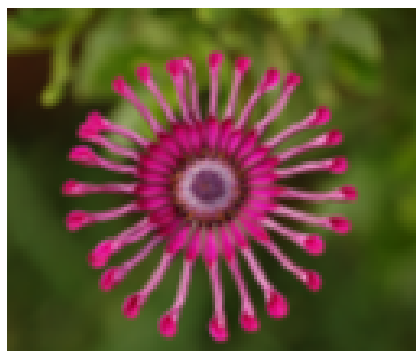

Table 1: This is a table

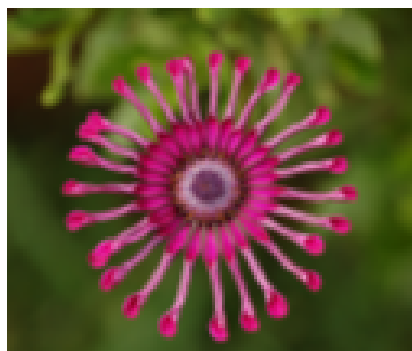

(a) subfigure 1-1

(b) subfigure 1-2

(c) subfigure 2-1

(d) subfigure 2-2

Figure 6: two figures

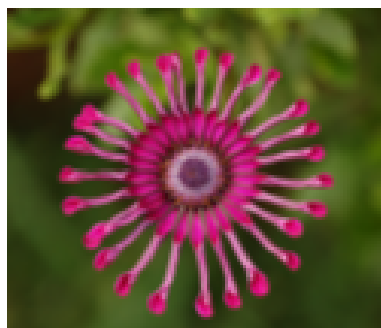

Figure 7: Centers Aligned Vertically

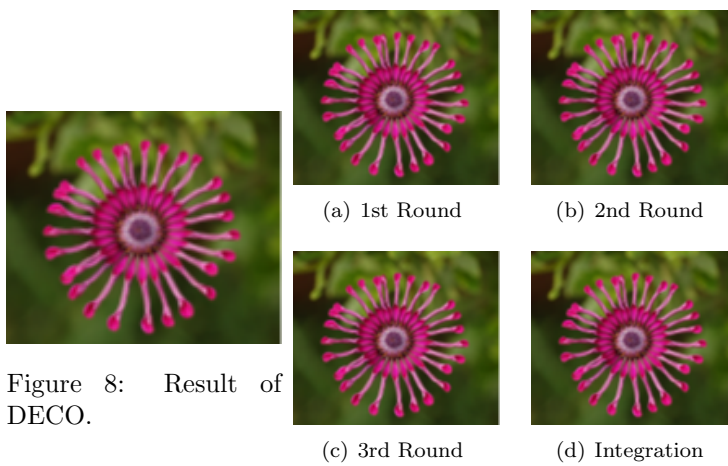

Figure 9: Multiple Rounds DBSCAN
